ASSIGNMENT OF PATENTS

KNOW ALL MEN BY THESE PRESENTS, that ILLINOIS TOOL WORKS INC., an Delaware corporation, hereinafter referred to as "Seller," for and in consideration of a certain sum of money, as adjusted or subsequently increased or decreased plus the Buyer's assumption of certain Assumed Liabilities defined in an Asset Purchase Agreement (the "Agreement") of even date between the parties hereto paid by KENNEDY ACQUISITION, INC., a Michigan corporation hereinafter referred to as "Buyer," the receipt whereof is hereby acknowledged, has bargained and sold and by these presents does grant and convey unto the Buyer, its successors and assigns, FOREVER the following assets:

(A) all right, title and interest (including the right to sue for past infringements) in and to the patents and applications listed on Exhibit A hereto any and all of the foregoing throughout the world, wherever deemed located (the "Patents");

TO HAVE AND TO HOLD all said assets hereby sold, assigned, transferred and conveyed unto the Buyer, its successors and assigns, to its and their own use FOREVER, and Seller, for its successors and assigns, does covenant and agree to and with the Buyer, its successors and assigns, to warrant and defend the sale of said property hereby made against all and every person or persons whatsoever.

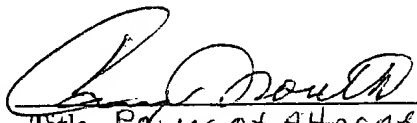

PROVIDED ALWAYS, that with respect to any assets which are included above which are in their nature by law, by their terms or otherwise, non-assignable, or which contain a covenant against assignment, this instrument shall, notwithstanding anything

herein elsewhere contained, be construed as an assignment to the Buyer of the equitable interest in the same insofar as legally permissible without violation of law or breach of the terms or conditions thereof, with the right in the Buyer insofar as so permissible to have said assets, if any, held in trust to enable the Buyer to use and enjoy the full benefits thereof and to have transferred to the Buyer any and all such property or rights which shall become assignable. If further contracts, agreements, documents or consents to assignment are or shall be necessary or helpful to transfer to Buyer, or to allow Buyer to fully own, use or exercise the rights to assets hereby sold, Seller agrees to execute all such agreements, documents or consents in a timely manner. In addition, Seller constitutes and appoints Buyer as its true and lawful attorney, irrevocably in its name and stead to transfer all or any part of its right, title and interest in and to the Patents, and for that purpose, to make and execute all necessary acts of assignment and transfer therefor with full power of substitution. If consent to assignment is not obtained where needed, or if an attempted assignment would be ineffective or would affect Seller's rights in such property or rights such that Buyer, in fact, would not receive such property or rights, Seller will cooperate with Buyer in any reasonable arrangement designed to provide for Buyer the benefits under any such assets, including collection for the account of Buyer of any amounts payable or becoming payable to Seller thereunder and enforcement at the cost and for the benefit of the Buyer of any and all rights of Seller against any party thereto arising out of the breach or cancellation by such party or otherwise.

PROVIDED FURTHER, that in the event of any inconsistency or conflict between the terms of this Assignment of Patents and the Agreement, the terms of the Agreement shall govern.

IN WITNESS WHEREOF, the undersigned has executed this Assignment of Patents this 29th day of August, 2003.
